RE: Wild Grass CBD Oil

Dear Wild Grass Products,

The CBD infused tincture manufactured by your company has been a fantastic addition to our product offerings here at Pain & Stress Center. Our clients love that your product is non-GMO, organically grown, and THC free. We have also heard our customers say they appreciate the simple ingredients in the formula, just glycerin, olive oil and CBD. Our clients have trusted us for over 38 years to provide products that work without additional fluff.

The majority of our clients are coming in to address anxiety, insomnia and chronic pain. We find that the 500 mg is great for insomnia and anxiety, while the 1000 mg is most beneficial for those with chronic pain. Clients are reporting better sleep, mood and reduced pain without side effects.

We are very pleased with the performance of your product line and will continue to offer this revolutionary product to our clientele.

Warmest Regards,

Laura Boyd, CNC
Operations Manager
Pain & Stress Center
